Phase 1A · Offline operator diagnostics, not a trained PINN or sparse-reconstruction result
A · Eight two-component sensors
Singular value of H Phi
Singular-value index
r=6
r=10
r=20
B · Offline operator discrepancy
Spatial closure / projected rate
POD rank
C · Temporal consistency (not pure time error)
Relative rate discrepancy
POD rank
7-point derivative vs full projected rate
5- vs 7-point stencil sensitivity
D · Full-state-initialized Galerkin
Instantaneous mass velocity error
Time since offline initial frame
r=6
r=10
r=20
